Remember to take some GREAT-PASTIES and/or ROCKIN-POCKETS home.

## A Little Pastie History

Pasties originated in Cornwall, England about 800 years ago and were made popular by the miners as an inexpensive tasty lunch that they could eat cold, or warm them in their pockets or with miner lamps.

The crust was never flaky, because they often times ate them with their dirty hands. They became popular about 150 years ago in upper Michigan and again as a result of miners using them for their lunch meal each day.

There are any number of variations, such as with carrots, rutabagas, potatoes, beef, pork, chicken and any number of items, probably because what went into them was, what was left over at their evening supper each day, which always went into a crust to become their lunch for the next day in the mines.

## Our ROCKIN-POCKETS™

Our Pasties became known as ROCKIN-POCKETS because the state of Wisconsin said they could not be called Pasties, when you wholesale them, only because they did not fit their description of a Pastie.

**"25% meat, with potato and onion in a crust."**

No mention of spices or anything else! So, I call them ROCKIN-POCKETS to go along with the ROCKS FOR FUN CAFE décor and humor.

We started making ROCKIN-POCKETS, Feb, 2008 and have sold over 26,000 to our thousands of happy and satisfied customers from over 863 towns in 48 states and 25 countries, that have stopped to see our now 311 humorous, whimsical, one-of-a-kind rock creations, valued at over \$2,713,009.63 that grace the walls of the Cafe and provide a chuckle for those that take out time to dine with us.

Many return with their friends and relatives to share an unusual experience while getting their chance to personally touch, to handle and to photograph our now famous, "Rock off the moon". As an added bonus for those that don't have one, they get their own personal, private and one-of-a-kind "Lucky Rock" of which over 29,000 have now been personally handed out by Don. The rock creations on the walls are not for sale, but are priced out, hopefully high enough so nobody would think of buying one. Yet, why does a 1913-nickel sell for \$3,000,000 dollars when it is really only 5 cents? Could it be, that "one-of-a-kind" has value?
